

if you do not have docker — feel free to use h2 in memory database for [file items service](#):

```
java file-items-service-4.3.20.jar  
# or  
java file-items-service.jar --spring.profiles.active=db-h2
```

and then run [file server](#):

```
java file-items-service-4.3.20.jar --spring.profiles.active=db-h2
```
