if you do not have docker—feel free to use h2 in memory database for file items service:

```
java file-items-service-4.3.3.jar
# or
java file-items-service.jar --spring.profiles.active=db-h2
```

1. and then run file server:

```
java file-items-service-{project-version}.jar --spring.profiles.active=db-h2
```
