install using postgres in docker

```
# docker compose file for postgres database
docker-compose up -d

# file-items data service
java -jar file-items-service-4.3.15.jar --spring.profiles.active=db-pg

# file server
java -jar file-server-4.3.15.jar --app.upload.path=./path/to/file-storage

# cleanup
docker-compose down -v
```

```
# docker compose file for postgres database
docker-compose up -d

# file-items data service
java -jar file-items-service-4.3.15.jar --spring.profiles.active=db-pg
```
